

**APPLICATION FOR FUNDING
TO THE
TEXAS WATER DEVELOPMENT BOARD
RESEARCH AND PLANNING FUND**

FOR

**DEVELOPMENT OF THE
2016 REGION – B
REGIONAL WATER PLAN**

April 7, 2011

I. GENERAL INFORMATION

1. LEGAL NAME OF APPLICANT

Red River Authority of Texas

2. REGIONAL WATER PLANNING GROUP

Regional Water Planning Group – Area B consists of a ten county area including Archer, Baylor, Clay, Cottle, Foard, Hardeman, King, Montague, Wichita, Wilbarger, and a portion of Young County encompassing the City of Olney. The planning area contains approximately 8,571 square miles with an estimated population of 198,837. Refer to Vicinity Map, **Figure 1** in **Appendix 6-1**, for a geographical presentation of the regional water planning area.

3. AUTHORITY OF LAW UNDER WHICH THE APPLICANT WAS CREATED

The Red River Authority of Texas was created in 1959 by Acts of the 56th Legislature as a political subdivision of the State, a body politic and corporate under Article XVI, Section 59 of the Texas Constitution.

4. APPLICANT’S OFFICIAL REPRESENTATIVE, NAME, TITLE, MAILING ADDRESS, PHONE NUMBER, FAX NUMBER, E-MAIL ADDRESS, AND VENDOR ID NUMBER

Mr. Curtis W. Campbell
General Manager
Red River Authority of Texas
P.O. Box 240
Wichita Falls, Texas 76307-0240
Telephone: (940) 723-2236
Fax: (940) 723-8531
email: ccampbell@rra.dst.tx.us
Vendor ID: 17510535457001

5. DUNS NUMBER

091758834

6. CENTRAL CONTRACT REGISTRATION NUMBER (CCR#)

Not a requirement for this contract.

7. IS THIS APPLICATION IN RESPONSE TO A REQUEST FOR APPLICATIONS PUBLISHED IN THE TEXAS REGISTER?

Yes No

8. IF YES TO NO. 7 ABOVE, LIST THE DOCUMENT NUMBER AND DATE OF PUBLICATION OF THE TEXAS REGISTER

Texas Register, TRD-201100237, February 4, 2011

9. TYPE OF PROPOSED PLANNING (CHECK ALL THAT APPLY)

INITIAL SCOPE OF WORK
DEVELOPMENT OF A REGIONAL WATER PLAN
REVISION OF A REGIONAL WATER PLAN
SPECIAL STUDIES APPROVED BY TWDB

10. TOTAL PROPOSED PLANNING COST

\$65,185

11. TOTAL GRANT FUNDS REQUESTED FROM THE TEXAS WATER DEVELOPMENT BOARD

\$65,185

12. DETAILED STATEMENT OF THE PURPOSE FOR WHICH THE MONEY WILL BE USED

To prepare and publish the 2016 Region B Regional Water Plan, in accordance with Item 15, the Detailed Scope of Work.

13. DETAILED DESCRIPTION OF WHY STATE FUNDING ASSISTANCE IS NEEDED

To fulfill the requirements of Senate Bill 1, 75th Legislative Session, Senate Bill 3, 80th Legislative Session, and subsequent rules promulgated by the Texas Water Development Board as described in 31 TAC Chapter 357 and 358. Additionally, the plan is charged with addressing specific requirements of Chapter 16 of the Texas Water Code (TWC). If the state is to retain the leading role in long-range planning for adequate water resources to meet the public needs as they occur, then the state must provide sufficient funding and coordination of the effort on behalf of its people. Meeting the people's need for adequate water resource is or should be one of the State's highest priorities because it yields the greatest public benefit. Without adequate state funding (and support), the smaller cities and rural communities will suffer the greatest.

14. IDENTIFY POTENTIAL SOURCES AND AMOUNTS OF FUNDING AVAILABLE FOR IMPLEMENTATION OF VIABLE SOLUTIONS RESULTING FROM PROPOSED PLANNING

The majority of capital funding in Region B typically comes from local sources in the form of municipal type bond issues supported by net revenue pledges from the sale of water and taxes. Detailed infrastructure financing information was included in Chapter 9 of the 2011 Region B Regional Water Plan. During this planning period changes in the sources or amounts of capital requirements ascertained during the course of study will be provided in the Final Plan.

II. PLANNING INFORMATION

15. DETAILED SCOPE OF WORK FOR PROPOSED PLANNING

The Scope of Work that follows meets the initial scope of work for the fourth cycle of regional water planning, as prepared by the Texas Water Development Board.

TASK 1 - PLANNING AREA DESCRIPTION

To be scoped, budgeted and incorporated by amendment into the contract at later date.

TASK 2A - NON-POPULATION RELATED WATER DEMAND PROJECTIONS

Texas Water Development Board (TWDB) staff, in conjunction with the Texas Commission on Environmental Quality (TCEQ), Texas Parks and Wildlife Department (TPWD), and Texas Department of Agriculture (TDA) will prepare draft water demand projections for all water demands unrelated to population (e.g. mining, manufacturing, irrigation, steam electric power, and livestock) with specific attention to updated mining water demand projections to be provided by the TWDB. TWDB staff will update water demand projections for all associated Water User Groups (WUGs) and provide them to RWPGs for their review and input. All projections will be extended through 2070.

RWPGs will then review the draft projections and may provide input to TWDB or request specific changes to the projections from TWDB. If adequate justification is provided by the RWPGs to TWDB, water demand projections may be revised by the TWDB. Once RWPG input and revision requests are considered, final water demand projections will be adopted by the TWDB's governing board. The adopted projections will then be provided to RWPGs. RWPGs must use the Board-adopted projections when preparing their regional water plans.

TWDB will directly populate the online planning database with all WUG-level projections and make related changes to the online planning database if revisions are made.

This Task includes, but is not limited to, performing all work in accordance with TWDB rules and guidance required to:

1. Receive and make publicly available the draft water demand projections provided by TWDB.
2. Evaluate draft water demand projections provided by TWDB.
3. Provide detailed feedback to TWDB on water demand projections, as necessary, including justification and documentation supporting suggested changes.
4. Review comments received by local entities and the public for compliance with TWDB requirements and incorporate changes which meet TWDB conditions for changes into revision requests to TWDB.
5. Prepare and submit numerical requests for revisions, in table format in accordance with TWDB guidance, of draft water demand projections, and process such requests based on, for example, requests from local entities within the region. The RWPG and/or local entities may provide required documentation and justification of requested revisions.
6. Communicate and/or meet with TWDB staff and/or local entities requesting revisions, as necessary.
7. Assist TWDB, as necessary, in resolving final allocations of water demands to water user groups to conform with any control totals defined by TWDB, for example, by county and/or region.
8. Prepare water demand projection summaries for WUGs using final, adopted projections to be provided by the TWDB, as necessary.
9. Modify any associated water demand projections for Wholesale Water Providers (WWPs), as necessary based on final, adopted projections.
10. Review and confirm the accuracy of the *TWDB DB17 Non-Population Water Demand Related* report from the online planning database (DB17) and incorporate this planning database report into the Technical Memorandum and draft and final regional water plans (labeled as such and with source reference).
11. Modify any aggregated water demand summaries, for example, for Wholesale Water Providers (WWPs) or irrigation districts, accordingly incorporate this planning database report into the Technical Memorandum and draft and final regional water plans (labeled as such and with source reference).
12. Update WWP contractual obligations and WUG 'seller' obligations to supply water to other entities and report this information along with projected demands including within the online planning database and within any planning memorandums or reports, as appropriate.

13. Complete and update required data elements within the online planning database (DB17).

TASK 2B - POPULATION AND POPULATION-RELATED WATER DEMAND PROJECTIONS

TWDB staff, in conjunction with the TCEQ, TPWD, and TDA will prepare draft population and associated water demand projections for all population-related water user groups in the 2016 Regional Water Plan (2016RWP) using data from the recent 2010 Census. TWDB staff will update population and associated water demand projections for all Water User Groups (WUGs) and provide them to RWPGs for their review and input. All projections will be extended through 2070.

RWPGs will then review the draft projections and may provide input to TWDB or request specific changes to the projections from TWDB. If adequate justification is provided by the RWPGs to TWDB, population and/or water demand projections may be revised by the TWDB. Once RWPG input and revision requests are considered, final population and associated water demand projections will be adopted by the TWDB. The adopted projections will then be provided to RWPGs. RWPGs must use the Board-adopted projections when preparing their regional water plans.

TWDB will directly populate the online planning database with all WUG-level projections and make related changes to the online planning database if revisions are made.

This Task includes, but is not limited to, performing all work in accordance with TWDB rules and guidance required to:

1. Receive and make publicly available the draft population and associated water demand projections provided by TWDB.
2. Evaluate draft population and associated water demand projections provided by TWDB.
3. Provide detailed feedback to TWDB on both population and associated water demand projections, as necessary, including justification and documentation supporting suggested changes.
4. Review comments received by local entities and the public for compliance with TWDB requirements and incorporate changes which meet TWDB conditions for changes into revision requests to TWDB.
5. Prepare and submit numerical requests, in table format in accordance with TWDB guidance, for revisions of draft population and/or water demand projections, and process such requests based on, for example, requests from local entities within

- the region. The RWPG and/or local entities may provide required documentation and justification of requested revisions.
6. Communicate and/or meet with TWDB staff and/or local entities requesting revisions, as necessary.
 7. Assist TWDB, as necessary, in resolving final allocations of population and water demands to water user groups to conform with any control totals defined by TWDB, for example, by county and/or region.
 8. Prepare population and water demand projection summaries for WUGs using final, adopted projections to be provided by the TWDB, as necessary for presentation in documents.
 9. Consider and include in all appropriate planning documents the projections of population and associated water demands for any new WUGs to be provided by the TWDB.
 10. Modify any associated water demand projections for WWP, as necessary based on final, adopted projections.
 11. Review and confirm the accuracy of the *TWDB DB17 Population* and associated *TWDB DB17 Non-population Water Demand* reports from the online planning database (DB17) and incorporate these planning database reports into the Technical Memorandum and draft and final regional water plans (labeled as such and with source reference).
 12. Modify any aggregated water demand summaries, for example, for Wholesale Water Providers (WWPs), accordingly and present in planning documents.
 13. Update WWP contractual obligations and WUG 'seller' obligations to supply water to other entities and report this information along with projected demands including within the online planning database and within any planning memorandums or reports, as appropriate.
 14. Complete and update required data elements within the online planning database (DB17).

TASK 3 - WATER SUPPLY ANALYSES

This task involves updating or adding: a) groundwater, surface water, reuse, and other water source availability estimates, and b) existing WUG and WWP water supplies that were included in the 2011 Regional Water Plan, in accordance with methodology described in **Section 3** of the *General Guidelines for Regional Water Plan Development* for estimating surface water, groundwater, systems, reuse, and other supplies during drought of record conditions. All water availability and water supply estimates will be extended through 2070.

This Task includes performing all work in accordance with TWDB rules and guidance required to:

D) Estimate a) Surface Water Availability and b) Existing WUG and WWP Surface Water Supplies:

1. Select hydrologic assumptions, models, and operational procedures for modeling the region's river basins and reservoirs using Texas Commission on Environmental Quality (TCEQ) Water Availability Models (WAMs) in a manner appropriate for assessment of current surface water supply and regional water planning purposes. Reservoir systems and their yields will be modeled in accordance with the *General Guidelines for Regional Water Plan Development*.
2. Obtain TWDB Executive Administrator approval of hydrologic assumptions or models and for any variations from modeling requirements in the *General Guidelines for Regional Water Plan Development*.
3. As necessary and appropriate, modify or update associated WAMs or other models to reflect recent changes to permits, transfers, legal requirements, new water rights, and/or specified operational requirements.
4. Assign available water supplies, as appropriate, to WUGs and WWPs including conducting demand analyses for WWPs.
5. Take into account Senate Bill 3 (SB3) environmental flow process recommendations and associated TCEQ rules (e.g. flows set-asides) within models and availability and existing water supply estimates; and, in locations without completed SB3 rules, other local studies or the environmental consensus criteria per Section 4.2 of the *General Guidelines for Regional Water Plan Development*.
6. Apply the TCEQ WAMs, as modified and approved by TWDB, and/or other appropriate models to quantify firm yield for major reservoirs, reservoir systems, and firm diversion for run-of-river water rights, as determined on at least a monthly time-step basis. Reservoir firm yield will be quantified based on the most recent measured capacity and estimated capacity in year 2070.
7. Compile TCEQ Water System Data Reports for municipal WUGs that use surface water and identify any physical constraints limiting existing water supplies to WUGs and/or WWPs. Limitations to be considered based on delivering treated water to WUGs. Other information that the RWPGs collect, for example, survey results, may be included in the evaluation of infrastructure capacity or limitations in delivering treated water to WUGs.
8. Take into consideration the recommendations of the SB3 environmental flows process and any resulting TCEQ rules or flow set-asides.
9. Update information on WWP contractual obligations and WUG 'seller' obligations to supply water to other entities including within the online planning database. Unless the RWPG considers it unlikely that a specific contract will be renewed, water supplies based on contractual agreements will be assumed to renew at the contract termination date, for example, if the contract provides for

renewal or extensions. Report this information within any planning memorandums or reports, as appropriate.

10. Based on the water availability, existing infrastructure, and associated physical and legal limitations, determine the existing surface water supply available from each surface water source to each WUG and WWP (including newly identified WUGs and WWPs) during a drought of record based on source water availability, infrastructure capacity, legal constraints, and/or operational limitations.
11. Complete and update all required data elements for TWDB online planning database DB17 through the web interface.
12. Compile firm yield and diversion information by Source, WUG, WWP, county, river basin, and planning region as necessary to obtain decadal estimates of existing surface water supply throughout the planning period. This will be facilitated by *TWDB DB17 Water Source Availability* and associated *TWDB DB17 WUG and WWP Existing Water Supply* reports using data provided by RWPGs and made available to all RWPGs through the online planning database interface.
13. Review, confirm the accuracy of, and incorporate the required associated planning database reports directly into the Technical Memorandum and draft and final regional water plans under Task 4C (labeled as such and with source reference).

II) Estimate a) Groundwater Availability and b) Existing WUG and WWP Groundwater Supplies:

Obtain and review the **Total Pumping** annual volumes that are developed by TWDB based on the Desired Future Conditions adopted by Groundwater Management Areas (GMAs). Total Pumping annual volumes for each aquifer will be available from TWDB through the online planning database interface, split into discrete geographic-aquifer units by: Aquifer; County; River Basin; Region; and, where applicable, additionally by Groundwater Conservation District (GCD).

1. In areas that were not considered in the DFC process and therefore do not have Total Pumping annual volumes but have ‘local’ groundwater supplies or minor aquifers, develop estimates according to the General Guidelines for Regional Water Plan Development.
2. Consider the impacts of the available Total Pumping annual volumes on the regional water plan including how it impacts: existing water supplies; identified water needs; and water management strategies that were recommended in the 2011 regional water plan.
3. In areas with Groundwater Conservation District (GCDs), obtain GCD Management Plans and GCD information to be considered when estimating existing supplies and water management strategies under future tasks.

4. Assign available, water supplies, as appropriate, to WUGs and WWPs including conducting demand analyses for WWPs.
5. Select hydrologic and other assumptions for distribution of available groundwater for potential future use by WUGs (e.g. via a pro-rationing policy) as either existing supply or as part of water management strategies including based on models and operational procedures appropriate for assessment of water supply and regional water planning purposes.
6. Compile TCEQ Water System Data Reports for municipal Water User Groups using groundwater and identify any physical constraints limiting existing water supplies to WUGs and/or WWPs. Limitations to be considered based on delivering treated water to WUGs. Other information that the RWPGs collect, for example, survey results, may be included in the evaluation of infrastructure capacity or limitations in delivering treated water to WUGs.
7. Update information on WWP contractual obligations and WUG 'seller' obligations to supply water to other entities including within the online planning database. Unless the RWPG considers it unlikely that a specific contract will be renewed, water supplies based on contractual agreements will be assumed to renew at the contract termination date, for example, if the contract provides for renewal or extensions. Report this information within any planning memorandums or reports, as appropriate.
8. Compile and/or update information regarding acquisitions of groundwater rights, for example, for transfer to municipal use, and account for same in the assessment of both availability and existing groundwater supplies.
9. Based on the water availability, existing infrastructure, and associated physical and legal limitations, determine the existing groundwater supply available from each water source to each WUG and WWP (including newly identified WUGs and WWPs) during a drought of record based on water availability, infrastructure capacity, legal constraints, and/or operational limitations.
10. Complete and update all required data elements for TWDB online planning database DB17 through the web interface.
11. Compile groundwater availability information by Source, Water User Group, Wholesale Water Provider, county, river basin, and planning region as necessary to obtain decadal estimates of supply throughout the planning period. This will be facilitated by *TWDB DB17 Water Source Availability* and associated *TWDB DB17 WUG and WWP Existing Water Supply* reports using data provided by RWPGs and made available to all RWPGs.

III) Estimate System, Reuse, and Other Types of existing supplies

Systems, Reuse, and Other Water Supplies

1. Integrate firm water supplies for WUGs using a system of supply sources (e.g., surface water, storage, and groundwater).
2. Research and quantify existing supplies and commitments of treated effluent through direct and indirect reuse.
3. Compile systems, reuse, and other availability information by Source, Water User Group, Wholesale Water Provider, county, river basin, and planning region as necessary to obtain decadal estimates of supply throughout the planning period.
4. Assign available water supplies, as appropriate, to WUGs and WWPs including conducting demand analyses for WWPs.
5. Identify and re-categorize existing sources in the online planning database to extract unique sources. In addition to surface water, groundwater, and reuse, for example, clarify the source types in the online planning database to separate out and re-label other specific water sources such as desalinated groundwater or desalinated surface water and any other supply types that are connected supplies.
6. Review and confirm the accuracy of the *TWDB DB17 Availability* and associated *TWDB DB17 Existing Water Supply* reports from the online planning database (DB17) and incorporate these planning database reports directly into the Technical Memorandum and other planning documents (labeled as such and with source reference).
7. Identify any physical constraints limiting these existing water supplies to WUGs and/or WWPs including based on TCEQ Water System Data Reports. Limitations to be considered based on delivering treated water to WUGs. Other information that the RWPGs collect, for example, survey results, may be included in the evaluation of infrastructure capacity or limitations in delivering treated water to WUGs.
8. Update information on WWP contractual obligations and WUG ‘seller’ obligations to supply water to other entities including within the online planning database. Unless the RWPG considers it unlikely that a specific contract will be renewed, water supplies based on contractual agreements will be assumed to renew at the contract termination date, for example, if the contract provides for renewal or extensions. Report this information within any planning memorandums or reports, as appropriate.
9. Based on the water availability, existing infrastructure, and associated physical and legal limitations, determine the existing system, reuse, and other water supplies available from each water source to each WUG and WWP (including newly identified WUGs and WWPs) during a drought of record based on source water availability, infrastructure capacity, legal constraints, and/or operational limitations.

10. Complete and update all required data elements for TWDB online planning database DB17 through the web interface.
11. Compile these supplies by Source, Water User Group, Wholesale Water Provider, county, river basin, and planning region as necessary to obtain decadal estimates of existing surface water supply throughout the planning period. This will be facilitated by *TWDB DB17 Water Source Availability* and associated *TWDB DB17 WUG and WWP Existing Water Supply* reports using data provided by RWPGs and made available to all RWPGs through the online planning database interface.
12. Review, confirm the accuracy of, and incorporate the required associated planning database reports directly into the Technical Memorandum and draft and final regional water plans under Task 4C (labeled as such and with source reference).

Includes all work required to coordinate with other planning regions to develop and allocate estimates of water availability and existing water supplies.

TASK 4A - IDENTIFICATION OF WATER NEEDS (ANALYSIS TO BE PERFORMED BY TWDB)

1. *Based upon updated projections of existing water supply and projected water demands under Tasks 2 and 3, and the associated data entered into the online planning database by RWPGs, TWDB will update computations of identified water needs (potential shortages) by:*
 - *WUGs*
 - *WWPs*

As decadal estimates of needs (potential shortages) as well as by, county, river basin, and planning region.
2. *The results of this computation will be provided by TWDB via the online planning database to RWPGs in a customizable format that is in accordance with TWDB rules as the TWDB DB17 Identified Water Needs report.*
3. *(Regions may also request additional, unique needs analysis (e.g. for a WWP) that the RWPG considers warranted. Such reports will be provided, if feasible based on the online database constraints and TWDB resources. The RWPG will need to enter or provide any additional data into the online planning database, that may be necessary to develop these evaluations.)*
4. **The online planning database needs report will be incorporated by the RWPG directly into the Technical Memorandum and draft and final regional water plans (labeled as such and with source reference).**
5. *Upon request, TWDB will perform a socioeconomic analysis of the economic effects of not meeting the identified water needs and update and summarize potential social and economic effects of not meeting projected water needs*

identified under Task 4A. This report will be provided to RWPGs as part of this Task and incorporated into the draft and final regional water plans.

- 6. If the RWPG requests a socioeconomic analysis from TWDB, the resulting socioeconomic report will be incorporated into the draft and final regional water plan by the RWPG.**

TASK 4B - IDENTIFICATION OF POTENTIALLY FEASIBLE WATER MANAGEMENT STRATEGIES

This Task includes, but is not limited to, performing all work in accordance with TWDB rules and guidance required to:

1. Receive public comment on a proposed process to be used by the RWPG to identify and select water management strategies for the 2016 regional water plan. Revise and update documentation of the process by which water management strategies that are potentially feasible for meeting a need were identified and selected for inclusion in the 2016 regional water plan. Include a description of the process selected by the RWPG in the Technical Memorandum and the draft and final regional water plans.
2. If applicable, specify what level of water conservation (as existing conservation or proposed within a water management strategy) is considered by the RWPG as the “highest practicable level” of conservation for WUGs and/or WWPs dependent upon water management strategies involving interbasin transfers.
3. Consider the TWDB Water Loss Audit Report and drought management when considering potentially feasible water management strategies as required by rules.
4. Update relevant portions of the regional water plan summary of existing water supply plans for local and regional entities. This task requires obtaining and considering existing water supply plans. Updated summary to be included in the draft and final regional water plans.
5. If no potentially feasible strategy can be identified for a WUG or WWP, document the reason for this in the Technical Memorandum and the draft and final regional water plans.
6. Consider recent studies and describe any significant changes in water management strategies described as being in the implementation phase in the 2011 RWP as well as any new projects in the implementation phase prior to adoption of the Initially Prepared 2016 Regional Water Plan.
7. Identify potential water management strategies to meet needs for all WUGs and WWPs with identified needs, including any new retail utility WUGs and WWPS that may have been previously aggregated under County-other in the 2011 regional water plan but which are being treated as unique entities for the 2016 regional water plan.

8. Present a list of the potentially feasible water management strategies, in table format, within the Technical Memorandum and the draft and final regional water plans.

TASK 4C PREPARE AND SUBMIT TECHNICAL MEMORANDUM

This Task includes, but is not limited to, performing all work in accordance with TWDB rules and guidance required to:

1. Prepare a concise Technical Memorandum that summarizes the work completed under Tasks 2, 3, 4A, 4B, and 4C and the general findings. To be considered administratively complete, the Technical Memorandum submitted must include:
 - a) an executive summary that shall be no longer than 2 pages.
 - b) each of the 'TWDB DB17' online planning database reports described under Tasks 2, 3, 4A, and 4B within the body of the memorandum.
 - c) a summary section for each Task performed to date (Tasks 2 - 4C)
2. Include in the Technical Memorandum sections that:
 - a) Explain reasons for significant changes in existing supplies of WUGs and WWPs.
 - b) Explain reasons for significant changes in identified water needs of WUGs and WWPs.
 - c) Specifically describe the impacts of the MAGs on the existing supplies and needs of WUG and WWPs in comparison to the 2011 regional water plan.
3. Include a separate section that is a proposed scope of work for Task 4D (evaluation and recommendation of water management strategies) that the RWPG considers necessary to complete its 2016 regional water plan, including an estimated budget for this work. Section will include:
 - a) a list of the potentially feasible water management strategies that are to be evaluated by the RWPG (and considered and potentially recommended by the RWPG). For each potential strategy listed:
 - a budget line item for performing a technical evaluation
 - information on what past evaluations have been performed for the potentially feasible water management strategy by the RWPG and/or others.
 - proposed scope of work for the proposed strategy technical evaluation.
 - b) a proposed scope of work and budget, broken down by water management strategy, to:
 - update technical analyses and documentation of water management strategies contained in the 2011 regional water plan for inclusion in the 2016 plan (e.g. including capital and annual cost updates).

- update or revise technical evaluations and documentation of water management strategies, based on new information from on-going studies outside of regional planning by project sponsors.
- c) a proposed scope of work and budget, broken down by item, to:
- select recommended water management strategies.
 - assign recommended strategies to meet projected needs.
 - consider alternative strategies for inclusion in the plan.
 - document evaluation of and selection of recommended water management strategies.
 - coordinate with sponsoring water user groups, wholesale water providers, and/or other resource agencies regarding any changed conditions in terms of projected needs, strategy modifications, planned facilities, market costs of water supply, endangered or threatened species, etc.
 - revise and/or update the water supply plan in the regional water plan for each WUG and WWP.
 - evaluate and/or update the estimated cumulative impacts of the regional water plan, for example on groundwater levels, spring discharges, bay and estuary inflows, and instream flows.
- d) proposed budget to complete and update all required data elements related to water management strategies for TWDB online planning database DB17 through the web interface; and, review, and confirm the accuracy of, and incorporate the required associated planning database reports into the draft and final regional water plans.
- e) description of how initially contracted Task 4D funds would specifically be spent, based on the budget items summarized in subsections a-d, if TWDB were to issue a written notice-to-proceed for Task 4D work.
4. Approve submittal of the Technical Memorandum to TWDB at a regular regional water planning group meeting. The Technical Memorandum must be submitted to TWDB no later than November 30th 2012.

TASK 4D EVALUATE AND RECOMMEND WATER MANAGEMENT STRATEGIES

Work under this task to be performed only after written notice-to-proceed.

Contract to be amended based scope of work to be developed and negotiated with TWDB under Task 4C.

TASKS - 5, 6, 7, 8, AND 9

To be scoped, budgeted and incorporated by amendment into the contract at later date.

TASK 10 - PUBLIC PARTICIPATION AND PLAN ADOPTION

This Task includes all work and eligible expenses required to hold meetings and include public input and participation through task 4C and a portion of 4D in accordance with TWDB rules and guidance:

Including, but not limited to:

1. Holding regular RWPG meetings
2. Posting public notices
3. Holding public input meetings
4. Holding special meetings
5. Collect and disseminate public input.
6. **Costs of technical and other consultants, as needed, to prepare for and participate in RWPG meetings, workshops, hearings, and any other special meetings during the development of the 2016 Regional Water Plan.**
7. Costs of performing any surveys of water suppliers or water user groups.
8. Coordination with and collection of information from groundwater conservation districts, water users, wholesale water providers, and any other entity involved with water planning in the region.
9. Assemble the Technical Memorandum document for submission to TWDB.
10. Revise relevant portions of the 2011 regional water plan for inclusion in the draft and final 2016 regional water plan.
11. Interregional cooperation and interregional conflict resolution efforts.

16. BUDGET FOR DETAILED SCOPE OF WORK BY TASK

Task	Description	Total Initial Funding
1	Planning Area Description (Update)	TBD
2A*	Non-Population Related Water Demand Projections (new projections)	9,181
2B*	Population & Population-Related Water Demand Projections (new projections)	2,935
3*	Evaluation of Existing Water Supply	19,699
4A**	Identification of Water Needs	0
4B	Identification of Potentially Feasible Water Management Strategies	1,252
4C*	Technical Memorandum (Summary of Tasks 1-4B) of Regional Water Plan	6,156
4D***	Evaluation and Selection of Water Management Strategies	6,263
5-9	Impacts of WMSs on Water Quality & Moving Water from Ag and Rural Areas; Conservation and Drought Management; Consistency with Long-term Protection of Natural Resources; Unique Reservoir/Stream Segments & Legislative Recommendations; Water Infrastructure Funding	TBD
10***	Adoption of Plan (administration & public participation for Tasks 1-4C)	19,699
	Total	\$ 65,185

*Related data results to be provided as TWDB-generated reports based on the online planning database (DB17).

TWDB-generated reports will be required to be incorporated into Technical Memoranda and the Draft and Adopted regional water plan documents.

**Analysis and reporting to be performed by TWDB staff using the information provided by the Region in the online planning database.

TWDB to provide customizable online reports

***Task only partially funded. When additional appropriations become available, contracts will need to be amended to add funds through a future Request for Applications.

17. EXPENSE BUDGET FOR DETAILED SCOPE OF WORK BY EXPENSE CATEGORY

Category	Total Amount
Other Expenses ¹	19,699
Subcontract Services	45,486
Voting Planning Member Travel ²	0
TOTAL	\$ 65,185

¹ Other Expenses is defined to include expendable supplies, communications, reproduction, postage, and costs of public meetings.

² Voting Planning Member Travel Expenses is defined as eligible travel expenses incurred by regional water planning members that cannot be reimbursed by any other entity, political subdivision, etc.

18. TIME SCHEDULE FOR COMPLETING THE DETAILED SCOPE OF WORK

The tentative initial time schedule for completing the detailed Scope of Work by task is attached as **Schedule 1** and contained in **Appendix 6-2**.

19. SPECIFIC DELIVERABLES FOR EACH TASK IN THE SCOPE OF WORK

Refer to Item 15, the Detailed Scope of Work.

20. METHOD OF MONITORING STUDY PROGRESS

Monitoring of the study progress will be conducted through periodic progress review meetings of the Regional Water Planning Group – Area B (RWPG-B) and/or its designated political subdivision and the contracted professional consultant. The Executive Committee of the RWPG-B will function as administrative oversight for recommending actions on the part of the RWPG-B, as may be needed. A Technical Advisory Committee, comprised of five members of the RWPG-B, will review technical or complex matters that may arise during planning process to provide assistance with conflict resolution and maintaining adequate momentum. All meetings conducted by the RWPG-B shall be open to the public in accordance with Chapter 551 of the Texas Government Code, as amended.

21. QUALIFICATIONS AND DIRECT EXPERIENCE OF PROPOSED PROJECT STAFF

The Red River Authority's staff and management have been actively engaged in water resource planning, management, protection, conservation and reclamation within the Red River Basin for fifty-one years and have been involved in the SB1 Planning Process since 1998. The Authority currently maintains a competent staff of professionals capable of managing each of the tasks described in this detailed scope of work.

Authority staff proposes to supervise and review all work performed by the professional consulting group engaged to conduct the technical analysis and prepare the report throughout the course of this planning study. The consultant group has been qualified and engaged by contract to provide their technical and scientific expertise in accordance with a scope of work designed to ensure compliance with the described outputs of each task and directives of the TWDB Rules, 31 TAC Chapter 357. Biggs and Mathews, Inc. of Wichita Falls will be the principal consultant in charge of project management in association with Alan Plummer and Associates, Inc. of Austin, and Freese and Nichols, Inc. of Fort Worth.

III. WRITTEN ASSURANCES

DUPLICATION OF EXISTING PROJECTS

The proposed revision and/or update of the *Regional Water Plan for Region B* described in this application does not duplicate any existing planning projects. The project will incorporate available information from existing plans, including the *2011 Region B Regional Water Plan* developed in the last round of regional water planning. The project is responsive to guidance and requirements developed by the Texas Water Development Board for the development of a regional water plan.

IMPLEMENTATION OF VIABLE SOLUTIONS IDENTIFIED THROUGH THE PROPOSED PLANNING WILL BE DILIGENTLY PURSUED AND IDENTIFICATION OF POTENTIAL SOURCES OF FUNDING FOR IMPLEMENTATION OF VIABLE SOLUTIONS

The Red River Authority of Texas will diligently pursue the implementation of all viable solutions identified through the proposed planning, to the extent that the Authority's involvement is consistent with the regional plan, appropriate and adequate funding is available. The Authority will encourage all participants in the regional planning area to pursue economically viable solutions and assist as necessary with determining potential funding sources for implementation of approved water management strategies for Region B.

IV PROOF OF NOTIFICATION

PROOF OF PUBLICATION

Refer to the attached Affidavit of Legal Notices and copies of the Official Publications marked as **Exhibit A** in **Appendix 6-3** for details.

SUBJECT: Notice of Public Meeting to Receive Input on Issues that Should be Addressed or Provisions that Should be Included in the Regional or State Water Plan for the Fourth Cycle of Regional Water Planning

NOTICE OF PUBLIC MEETING **REGIONAL WATER PLANNING**

Notice is hereby given that the Regional Water Planning Group – Area B is seeking input from the public on the scope of planning activities to be considered during the Fourth Cycle of Regional Water Planning.

The Public Meeting will be held in conjunction with the Region B Planning Group Meeting, to be held **Wednesday, May 18, 2011 at 10:00 a.m.**, at the Red River Authority of Texas Administrative Office, 3000 Hammon Road, Wichita Falls, Texas. Written and oral comments (not to exceed five (5) minutes per speaker) regarding the scope of activities to be considered during the Fourth Cycle of Regional Water Planning will be accepted at this meeting.

The Regional Water Planning Group – Area B includes the following Texas counties: Archer, Baylor, Clay, Cottle, Foard, Hardeman, King, Montague, Wichita, Wilbarger, and the portion of Young County that encompasses the City of Olney.

For additional information, please contact Mr. Curtis W. Campbell, Red River Authority of Texas, P.O. Box 240, Wichita Falls, Texas 76307-0240, ccampbell@rra.dst.tx.us.

SUBJECT: Notice of Application for Regional Water Planning Grant Funding for the Fourth Cycle of Regional Water Planning

NOTICE TO PUBLIC **REGIONAL WATER PLANNING**

Notice is hereby given that the Red River Authority of Texas will submit by 5:00 P.M., April 8, 2011, a grant application for financial assistance to the Texas Water Development Board (TWDB) on behalf of Region B, to carry out planning activities to develop the *2016 Region B Regional Water Plan* as part of the state's Fourth Cycle (2012 – 2016) of Regional Water Planning.

The Regional Water Planning Group – Area B includes the following Texas counties: Archer, Baylor, Clay, Cottle, Foard, Hardeman, King, Montague, Wichita, Wilbarger, and the portion of Young County that encompasses the City of Olney.

Copies of the grant application may be obtained from Red River Authority of Texas when it becomes available or online at www.rra.dst.tx.us. **Written comments** from the public regarding the grant application must be submitted to the Red River Authority of Texas and the TWDB by **no later than 5:00 p.m., Monday, May 2, 2011**. Comments can be submitted to Red River Authority of Texas and the TWDB as follows:

Mr. Curtis W. Campbell	Executive Administrator
Administrative Agent for Region B	Texas Water Development Board
Red River Authority of Texas	P.O. Box 13231
P.O. Box 240	Austin, Texas 78711-3231
